

# Overall Data Management and Operations

# Overview

- Data curation and content management
- Coordinate between NCI, JPL, DMCC and a curator
- Connect to the scientists/PIs
- Organize the curation effort
  - Recommend by organ groups
- Support relation of data across multiple systems/databases
- Support capture, review and QA of the data
- Define operational processes for systems

# Current Activities

- Dartmouth funded for Pilot Content Management Activity
- Coordinate with DMCC to populate eSIS
- Draft process developed for
  - Ontology
  - Biomarker Database
  - eCAS
- EKE released

# Next Steps

- Dartmouth provide content management for GI Collaborative Group. Other sites funded to capture data and curate for other organ specific collaborative groups.
- Continue to develop deep content for EKE
- Continue to define processes for all systems
